You are Team Hestia

Hestia is the ancient Greek goddess of the home and hearth.

You will investigate the Land Registry of England & Wales's database of every home sale in the UK from October 1995 until September 2018.

The prices paid are included, and homes are included multiple times if they are sold more than once in that period.

The meaning of the columns is explained here:
https://www.gov.uk/guidance/about-the-price-paid-data#explanations-of-column-headers-in-the-ppd

---

Some questions you could ask:

- Can you cross-correlate this with weather or climate to find out how temperature or rainfall affect house prices? Or with air quality?
- Can you find some good ways to visualize this data set?
- Where have house prices increased or decreased the most over time?
- Where are homes sold the most often?
